

BABYCAT 34™

For kittens in the 1st growth stage: weaning to 4 months

Kittens grow in 2 unique phases. In the first stage, weaning to 4 months, the switch from milk to solids is delicate and can create digestive issues for the kitten. The immunity transmitted by the mother decreases when the kitten's own immune defenses are not yet fully functional. Proper nutrition is essential to getting babycats off to a healthy start.

Immunity Booster

The babycat is extra-sensitive because of the loss of natural immunity from her mother's milk. BABYCAT 34™ contains a patented complex of immunity boosting antioxidants (taurine, lutein and vitamins E & C) to strengthen the immune system, as well as L-lysine and mannan-oligosaccharides (MOS) to naturally stimulate the production of antibodies to help protect the babycat.

Easy Weaning Kibble

Babycats have baby teeth and need help transitioning from their mother's milk. BABYCAT 34™'s tiny, ultra-soft kibble are designed for easy grasping & chewing by the baby kitten's tiny jaws and can be rehydrated, making the transition to solid food easier.

Easy to Digest

A babycat needs a food that is gentle on her developing digestive system. BABYCAT 34™ is made with highly digestible carbohydrates and proteins (like brown rice, chicken meal and dried egg powder), prebiotics (like mannan- and fructo-oligosaccharides), fiber (from dried beet pulp and powdered cellulose) and omega 3 fatty acids, all of which make digestion easier for your babycat's tummy.

Ingredients

Chicken meal, chicken fat, rice, corn gluten meal, corn, natural flavors, dried egg powder, dried beet pulp, dried brewers yeast, soybean oil, anchovy oil (source of EPA and DHA omega 3 essential fatty acids), L-lysine, powdered cellulose, salt, sodium silico aluminate, fructo-oligosaccharides, potassium chloride, calcium carbonate, brewers yeast extract (source of mannan-oligosaccharides), choline chloride, taurine, vitamins [DL-alpha tocopherol acetate (source of vitamin E), L-ascorbyl-2-phosphate (source of vitamin C), biotin, niacin, riboflavin (vitamin B2), D-calcium pantothenate, pyridoxine hydrochloride (vitamin B6), vitamin A acetate, thiamine mononitrate (vitamin B1), folic acid, vitamin B12 supplement, vitamin D3 supplement], trace minerals [zinc oxide, zinc proteinate, ferrous sulfate, manganese proteinate, copper sulfate, copper proteinate, manganous oxide, calcium iodate, sodium selenite], marigold extract (Calendula officinalis L., source of lutein), L-carnitine, preserved with natural mixed tocopherols (source of vitamin E) and citric acid, rosemary extract.
